

TectaAmerica, the largest national commercial roofing company in the U.S, has partnered with Nationwide Foam Recycling, the country's largest rigid foam insulation board and membrane recycler for commercial flat roof replacement projects.

A Word From The President CEI Tecta

CEI ROOFING TEXAS, LLC
A **TECTAAMERICA** COMPANY

We at CEI/Tecta would like to let you know how pleased we are with the services provided by Nationwide Foam Recycling. With completed projects in MO, NE, OK and TX we have recycled sixty truckloads of foam and membrane that otherwise would have wound up in landfills. While NFR was included in the specifications of some of the projects, the pricing was better than land fill in the others!

Our initial concerns over potential increased labor costs were quickly put to rest when we completed our first specified projects and realized that the slight changes in process amounted to a "wash" in labor time and costs. The NFR Logistics team has performed flawlessly, ensuring that all equipment was on site, on time and swapped out as requested.

We now include a recycling option on all jobs that fit the profile. If any Tecta offices have additional questions please feel free to contact us. Thanks again and we look forward to meeting our clients' recycling needs, and saving money, with Nationwide Foam Recycling.

Byron Warnick, *President CEI Tecta* Rick Coulter, *Project Manager CEI Tecta*

Corporately, TectaAmerica and Nationwide Foam Recycling have processed over 270,000 cubic feet of Rigid Foam Insulation and over 490,000 lbs of Membrane.
